

**EC type-examination procedures**  
as applied by BAM with regard to  
**Theatrical Pyrotechnic Articles (T1 and T2)**

Even though the respective harmonised standards according to article 8 of the *Directive 2007/23/EC of the European Parliament and of the Council of 23 May 2007 on the placing on the market of pyrotechnic articles* are still under development, BAM applies the preliminary Standard **prEN 16256 parts 1-5** to the assignment of theatrical pyrotechnic articles to categories T1 and T2, as well as to the respective conformity assessment procedures according to Module B (Annex II of the Directive 2007/23/EC) in order to check if the essential safety requirements (ESR) set out in Annex I of the Directive 2007/23/EC are met.

BAM reserves the right to modify a test condition for categorisation and to deviate from above statements where due considerations make this necessary to comply with the provisions of the Pyrotechnic Articles Directive.
