About BAM

BAM promotes safety in technology and chemistry.

As a BMWi departmental research institute, BAM performs research, testing and offers advisory support to protect people, the environment and material goods. Its activity in the fields of materials science, materials engineering and chemistry is focussed on the technical safety of products and processes.

BAM’s research is directed towards substances, materials, building elements, components and facilities as well as natural and technical systems important for the national economy and relevant to society. It also tests and assesses their safe handling and operation. BAM develops and validates analysis procedures and assessment methods, models and necessary standards and provides science-based services for the German industry in a European and international framework.

Plan your visit at BAM

We have compiled some travel information for you.

Contact

Bundesanstalt für Materialforschung und -prüfung (BAM)

Locations

There are three BAM locations in Berlin at four addresses, and there is a BAM Test Site for Technical Safety (BAM TTS) 60 km south of Berlin. We advise to use your travel planner before you visit us.

The following public transport connections are just a few of the many ways to get to us by S-Bahn, U-Bahn and bus. Please check the website or app of the Berliner Verkehrsbetriebe (BVG, Berlin public transport) for current construction works or technical disruptions.
